Fawter Online is a service launched by STS PayOne to help merchants seamlessly convert regular, offline orders into online invoices without needing an e-commerce website.

With a very simple workflow, a merchant generates a "Payment URL", which is then shared with the customer through email, SMS, or social media. Once received, the customer clicks on the "Payment URL" to land on a secure payment page, pre-filled with the

relevant order details; to proceed with the payment ONLINE, using debit cards, credit card and many other payment options without exposing the merchants to cardholder sensitive data.

The service enables merchants to track the status of generated invoices and receive notifications once a payment takes place for timely delivery and fulfillment, as well as generating reports for the reconciliation with the acquiring bank.

About STS PayOne

STS PayOne is a leading processor and provider of payment gateway solutions, utilizing in-house developed technology, STS PayOne delivers mission-critical, enterprise-scale solutions that are PCI compliant, and takes pride in its unparalleled agility in

order to effectively cater to the specific needs of clients through its team of highly qualified experts. STS PayOne offers Fawter Online service to merchants in GCC and Middle East countries, directly or through licensed acquirers.
